

E2 Wynyard –Auckland

Client: LT McGuinness

Completion: September 2018

System: 7500m2 RoofLogic Ultratherm Xtreme FiberTite roof, canopies and balconies

SWP Commercial had the honour of working with LT McGuinness on their first landmark project on the fast-changing landscape of Auckland's Wynyard Quarter.

The project comprised of 3 buildings, Pavilions, Town houses and Apartments which all had warm roofs installed, with some becoming green roofs. There were also the many balconies that had to be waterproofed before the jacks and tiles installed. The FiberTite membrane allowed us to install and detail with speed and ease.

The uncertain Auckland weather is always a battle during construction, although being involved in the LT McGuinness culture and their drive to meet the program, made this project one to be proud of.
