Finished Car Park

- Project Name:** Riccarton Mall Car Park
- Location:** Christchurch
- Project Size:** 17,800 sqm
- System:** Matacryn and Polytuff systems
- Client:** Westfield (New Zealand) Ltd
- Completion Date:** July 2014

SWP were engaged by Westfield to remove the existing failed membrane and install a new Matacryn System to 12,600m² and Polytuff System to 5,200m² at Westfield Riccarton. The works were undertaken on a functioning shopping centre, one of the busiest in the country. This posed unique problems around traffic management and health and safety. Whist also preventing water ingress into the operating retailers below. Westfield were extremely happy with the result and have engaged SWP on three subsequent projects.
