

**Saint Mary of the Angels - Wellington**  
1922 reinforced concrete and brick construction

## Consultants: Bullement Fortune Architects Ltd

Refurbishment Started March 2003 - Completed 2004

### Major Refurbishment

The major refurbishment of this iconic building was completed within 9 months. Plaster repairs and crack addressment has been carried out including waterproofing of all parapets and ledges etc.

Building was finished in StoSilco G Color a breathable facade paint.

### Works that have been done:

- Repairs of spalling concrete work
- Concrete repair mortars
- Re-pinning of all stained glass windows
- DEGADUR injection to various cracked elements
- Cleaning of the brickwork using a European Joss cleaning system
- Removal and refurbishment of all crosses providing a durable lacquer finish
- Application of Protectosil treatment for cleaned brick work
- Re-coating of the entire building facade in breathable mineral coating
